

OriCell Neural Stem Cell Cryopreservation Medium

Catalog No.GUXNX-07031

Product Description:

OriCell Neural Stem Cell Cryopreservation Medium is a serum-Free cell freezing medium of Neural Stem Cells.

The product is intended for laboratory research use only, and not for clinical and house hold applications, or other uses.

Features

- Special for Neural Stem Cells(Rat/Mouse)
- Prepare in Growth Medium of cells (DMEM)
- Formulated with DMSO(10%)

Packing

50 mL/ Bottle

20 mL/ Bottle

Instructions:

Cryopreservation

1. Select the cells in logarithmic growth phase according to the methods used to collect cells in vitro. Perform a cell count to determine the viable cell density.
2. Centrifuge the cells for 3-5minutes at 250g, 20°C. Remove the supernatant using a pipette.
3. Resuspend the precipitate with Cryopreservation Medium at the cell density of 10^5 - 10^6 cells/mL.
4. Dispense aliquots of the cell suspension into cryogenic storage vials that are properly labeled.
5. Place the vials in a programmed controlled rate freezing apparatus and make sure the cooling rate of 1°C/min.
6. Transfer the frozen vials to liquid nitrogen for preservation after 24 hours.

Thawing

1. Remove the cryovial of frozen cells from storage and quickly thaw the vial in 37°C water bath.
2. Gently dilute and mix the cells with 8mL-10mL of cell culture medium.
3. Centrifuge the cells for 3-5minutes at 250g, 20°C.
4. Carefully aspirate as much of the supernatant as possible and add 2-3mL of cell culture medium to resuspend the cells.
5. Transfer the cells into appropriate growth vessel and incubate at 37°C in a 5% CO₂ humidified incubator.

Stability/Storage:

Store at 2-8°C. The product is stable at 2-8°C for up to 1 year. The product should be discarded beyond the labeled expiration date.

For optimal performance, repeated warming/cooling and freeze-thawing should be avoided.

Quality Control:

Neural Stem Cell Cryopreservation Medium is performance tested on Neural Stem Cell (Rat/Mouse).

Standard evaluation includes:

1. Sterility test (bacteria, fungi, mold and mycoplasma)
2. pH test
3. Osmolality
4. Endotoxin
